"How to make our schools more sustainable, ecofriendly and economical considering cultural and social aspects"

**M. ELENA VALLE
SANTOS
IES LOS SAUCES
30-5-2022**

Aim of this Project

The aim of our project is to create a global school based on sustainability, economy and care of the Nature with our students. Raising awareness for the environment. Helping to save together our planet health by practising some activities with our students to make them feel responsible that our environment is a heritage to keep for our descendants.

Our students will research on Fauna, Flora, analysing comparatively water and air quality. Detecting pros and cons in the use of resources in both countries. They will learn and develop sustainable goals set by Unesco in order to improve our schools as micro-societies.

We want to work on the issue of environmental education from different subjects and levels.

Objetivos

These are the main goals of our project:

- 1) Increase student's interest and love for nature
- 2) Socialization of the student in different languages and using digital tools.
- 3) Develop the student's sense of responsibility, self-autonomy and self-awareness on the topics which are going to be developed.
- 4) Develop student's awareness of nature protection taking into account the sustainable goals set by the Unesco.
- 5) Improve student's language skills by communicating with foreign partners
- 6) Awareness about the artistic abilities of students
- 7) Provide a new perspective to students on how they can use the science of Biology in everyday life.
- 8) Learn about the use of the scientific method to do all kinds of research.
- 9) Analyse our own school/ society, the place and country where we live and design strategies to do it more economical and ecofriendly, taking into account our own culture and traditions and making contrasts with other countries´.

Proceso de trabajo

We have the following initial planning:

First Term of the school year 2021/ 22:

- * Addition of project partners, design groups, subjects involved, tasks and schedule of activities.

Second term:

- * Research on Reducing waste and the importance of recycling. Analysis and scientific workshops on the quality of air and water and its effects on nature.
- * How to improve our local resources and places, such as " La vía verde", our rivers, our lakes and even our own school.
- *Learn and compare how to reduce the greenhouse effect.

Final Term:

- *Creation of videos, posters and other digital and scientific materials.
- *Sustainable energy resources used in our school garden.
- * Gather all the activities and create a final product
- * Use our local radio station to broadcast all the stages and final steps in our project.

Resultados esperados

As a result of our project, students will improve cooperation and communication skills. They will have increased motivation and improve their self-confidence by increasing the interest and love of nature and develop awareness of nature protection.

We will use three different languages along all the project, so that they will Improve language skills and socialization. Our local radio station will help them to communicate and broadcast our final products.

Besides, social awareness with the planet will be created.

By the use of digital tools they will improve ICT skills during

Final products expected such as:

- *Virtual and real exhibitions of videos, posters, digital materials, etc.
- *Colaboration with the Town Hall to show the results and final impacts of our project.
- *Use of the school web page, school social media and our digital magazine to spread results.

How to make our schools more sustainable, ecofriendly and economical considering cultural and social aspects

The aim of our project is to create a global school based on sustainability, economy and care of the Nature with our students. Raising awareness for the environment. Helping to save together our planet health by practising some activities with our students to make them feel responsible that our environment is a heritage to keep for our descendants.

Our students will research on Fauna, Flora, analysing comparatively water and air quality. Detecting pros and cons in the use of resources in both countries. They will learn and develop sustainable goals set by Unesco in order to improve our schools as micro-societies.

Getting to know each other

In this project students and teachers from two different countries co-operate. We come from different cultures, we have different languages, manners, traditions, maybe religions, and values. All this makes this project so interesting and fun.

To make this co-operation nice we need to get to know each other first.

The online meeting will be held on the 24th of March from 7.30 to 9.00 a.m. GMT (begins 9.30 Finnish time and 8.30 Spanish time)
